

### **Vulcan Spring to Attend MD&M West**

Revisiting the West Coast After a Year of No Travel

**Telford, Pennsylvania:** Vulcan Spring & Mfg. has announced it is going to participate in person at MD&M West, where Medtech engineers, leaders, and companies gather to develop life-changing solutions and medical devices.

Based in Anaheim, the event will expo and educate attendees on the latest medical products, technology, and solutions. Vulcan's ISO 13485 team will once again be able to connect face-to-face, showcasing their custom flat and round wire steel springs for critical life-saving devices.

"This will be our first in-person expo in over a year, and we're excited to gather with people again. We missed these genuine face-to-face interactions. Attending MD&M West has us prepared to reconnect and ready for new opportunities," says Scott Rankin, Visionary & President at Vulcan Spring.

It will be held in Anaheim, California from 10-12 August 2021 at the Anaheim Convention Center. Vulcan Spring will be at booth # 2196.
